

riv comfort

Your home, your comfort.

Based on what we saw out there, here's where things stand and what we'd recommend.

- **Equipment age** 10+ years
- **Refrigerant condition** Showing wear
- **Home comfort** A few things to address

Here's our plan together.

Three simple steps. By the end you'll know exactly what makes sense for your home.

01

**Walk through
the options**

02

**Talk through
the budget**

03

**Yes or no
at the end**

All we'll ask at the end is yes or no — that's it.

No pressure to decide later or think about it. A clear answer either way.

What older systems cost you.

Past 10 years, four things start adding up — every month, every year.

Higher bills

Same comfort,
more money

Uneven comfort

Hot upstairs,
cold basement

Repairs add up

More breakdowns
every year

Air quality

Old ductwork,
old dust

Replace or leave it?

Eventually, the system will need to be replaced. The question is when.

Leave it.

Same problem, growing every year.

- Bills keep climbing
- Repairs compound
- System eventually fails

Replace it.

New equipment, lower bills, peace of mind.

- Lower monthly bills
- Even comfort
- Long-term peace of mind

Nine things you'll notice.

These are the differences a new system actually delivers, beyond "it works."

Better airflow
throughout home

Faster heat
and cooling

More efficient
lower bills

Less waste
tight ductwork

Cleaner air
better filtration

Humidity control
actually pulls moisture

Longer warranty
10+ years parts

Right sizing
matched to your home

Smart control
phone, schedule, away

Premium

The best we install. Everything dialed in.

Variable-speed
compressor.

Higher SEER
rating.

Longest
warranty.

Premium
ductwork.

Smart
thermostat.

BEST FOR

Long-term homeowners who want the best — and notice every small difference in daily comfort.

Comfort+

Where most homeowners land. Real comfort upgrade.

Two-stage
cooling.

Active humidity
control.

Quieter outdoor
unit.

Minimal
ductwork.

BEST FOR

A real upgrade in comfort and efficiency — not just new equipment.
The sweet spot for most homes.

Comfort

Reliable. Refreshed. Just works.

New equipment,
fresh start.

Better efficiency
than old.

Standard
warranty.

Programmable
thermostat.

BEST FOR
A clean, reliable replacement — without paying for
features you wouldn't notice.

Ready to make it real.

Once you decide on a tier, here's what happens.

01

Today

We finalize the tier and budget piece together. Quick application — about 90 seconds.

02

This week

Our coordinator schedules the install around your calendar. Usually 1-2 weeks out.

03

Install day

Certified team arrives. Old system out. New system in. Walkthrough so you know how to use it.

Same standard. Every install. Every home.
